

$$\bullet I_\alpha \quad \bullet I_\beta - D \xrightarrow{+2} \bullet I_\beta - (D - 2)$$

(a)

$$\alpha = 3, \beta = 3, D = 4$$

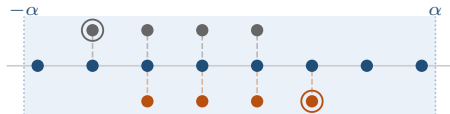

$$2 \rightarrow 3$$

$$\varepsilon = 1$$

(b)

$$\alpha = 7, \beta = 3, D = 2$$

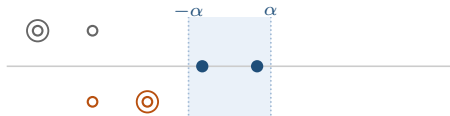

$$4 \rightarrow 4$$

$$\varepsilon = 0$$

(c)

$$\alpha = 1, \beta = 1, D = 6$$

$$0 \rightarrow 0$$

$$\varepsilon = 0$$

(d)
